# Aye-aye

A creepy-looking little creature....

- How does an aye-aye find its food? By using its long fingers and something called percussive foraging.
- How many times a second do they tap their finger while searching for food? They tap 8 times a second.
- They aye-aye may be facing extinction. Why? Because the locals think that if an aye-aye points at you, it is dooming you to death; so they kill them.

# ***The Gar***

Though they can't harm you, gars are still a freaky fish!

- The gar is a \_\_\_\_\_ fish.
- It can grow to be about \_\_\_\_\_ feet long.
- It has \_\_\_\_\_ rows of teeth.
- The gar has boney \_\_\_\_\_ scales made of \_\_\_\_\_.
- Can you eat a gar? \_\_\_\_\_  
\_\_\_\_\_
- What part of the gar should you never eat? \_\_\_\_\_
- How long do gars live? \_\_\_\_\_  
\_\_\_\_\_

# ***The Gar***

Though they can't harm you, gars are still a freaky fish!
